

SEATTLE PUBLIC SCHOOLS ALTERNATIVE MATH PLACEMENT
For Seattle Public Schools graduates who plan to take mathematics at Seattle Colleges *within one-two years of high school graduation** or for Seattle Public Schools running start students.

The Seattle Colleges use multiple methods to place incoming students into their first Math class. The following chart provides placement information based on a student's performance in their last* math class in high school.

<i>If your last math course was ...</i>	<i>And you earned a grade of _____ both semesters.</i>	<i>And you completed it within _____ of date of enrollment.</i>	<i>Your placement will be:</i>

*** Important Note for reading this chart:** *Refer to the 1-2 year time frame for courses and grades in this grid for placement. This does not have to be the last math course taken. The high school course taken within the indicated year(s) from the date of enrollment at a Seattle College is the guideline, not years since high school graduation.*

- Students who earn a B- or lower in their last Math class must use another form of placement, and should check with the Seattle College they would like to attend.
- Taking Applied Math as a third year math course in high school is not equivalent to Algebra 2 and cannot be used for math placement.
- If a student has IB Further Math A&B, HMA3247/3248*, as their last math class, they can be placed using their grade in Calculus.
- This table is for placement only. Credit may be granted by AP or IB exam scores. See the college websites for more details.
